

CENTRAL PENNSYLVANIA: PRIME LOCATION FOR PLASTICS

Top Five Reasons Plastics Companies
Choose Central Pennsylvania

SEKISUI Polymer Innovations, LLC, Bloomsburg, PA.

1 BEST AT MAKING AND MOVING PRODUCT

Central PA is in a prime northeast location to access major US and Canadian markets with an uncongested logistics network of highways, railways, and airports to move product efficiently. Available are existing industrial buildings and ready to build land sites with strong infrastructure, competitively priced with attractive financial and tax incentives.

2 WORLD CLASS INNOVATION AND TECHNOLOGY RESOURCES

Central PA is proudly home to 7 colleges and universities that have over 75,000 students enrolled and several premier technical institutions including the Pennsylvania College of Technology Plastics Innovation & Resource Center providing an incredible talent pool, globally recognized training, research and development. A vast network exists in Central PA of educational institutions, research and technology organizations that provide dedicated resources to advance industry.

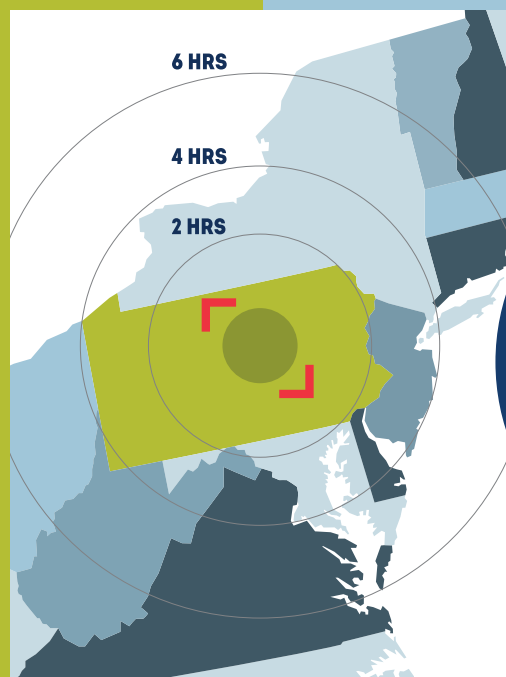

Central Pennsylvania is proudly home to an established, diverse plastics industry.

Penn College provides a pipeline of highly trained graduates from our plastics programs, customized training across all areas of plastics operations, and R&D capabilities for material, products and process improvement projects.

Williamsport, Lycoming County

Panda Hummel Station is a \$1 Billion 1,124-megawatt natural gas fired power plant along the Susquehanna River in Snyder County.

Shamokin Dam, Snyder County

3 PEOPLE

Central PA is widely recognized by employers as a prime location for a dedicated, hardworking talent force that has ingenuity and pride. There are over 25,000 businesses employing over 290,000 people with strong community support for manufacturing and growth of economic opportunities.

4 QUALITY OF LIFE & INVESTMENT IN THE FUTURE

Central PA provides the families that call this region home high quality education options, affordable living options and an outstanding quality of life. Billions of dollars in infrastructure investments are taking place to provide smart capacity in all areas of infrastructure.

Lewistown, PA

5 ENERGY COST ADVANTAGES

Pennsylvania is home to the 2nd largest energy field in the world. Pennsylvania's Marcellus & Utica Shale play provides plastics manufacturers with assurance that they will enjoy unique cost advantages for decades. Pennsylvania is the second largest U.S. producer of natural gas, expected to produce 40% of U.S. natural gas by 2030. Long term, low cost, reliable energy resources abound.

Region's resource for corporate location and expansion decisions. Contact Focus Central PA for a confidential and efficient response to information about opportunities in Central Pennsylvania to support your company's growth strategy.

IN GOOD COMPANY

Central Pennsylvania is proudly home to small and large plastic companies that are quality employers, community neighbors and growing.

We are proud to further our commitment to the roofing industry through this investment in New Columbia and to create new, skilled manufacturing jobs right here in the U.S.

Jim Schnepfer

President, GAF

GAF Warehouse

SEKISUI Polymer Innovations is committed to continued investments in central Pennsylvania because of access to an incredible natural resource - the talented, creative, and engaged people of central Pennsylvania. Our business model depends on advanced manufacturing skills. The combination of state support and local commitment to workforce development makes this the ideal location to manufacture next generation materials for growing global markets like aviation, mass transit, medical devices, robotics, and autonomous vehicles.
