

Focus Central Pennsylvania

Regionally Focused. Connected Locally

Pennsylvania is one of the most successful places in both the United States and Canada to have transitioned to a deregulated energy market. Deregulation allows companies to competitively shop for their energy generation by source and price.

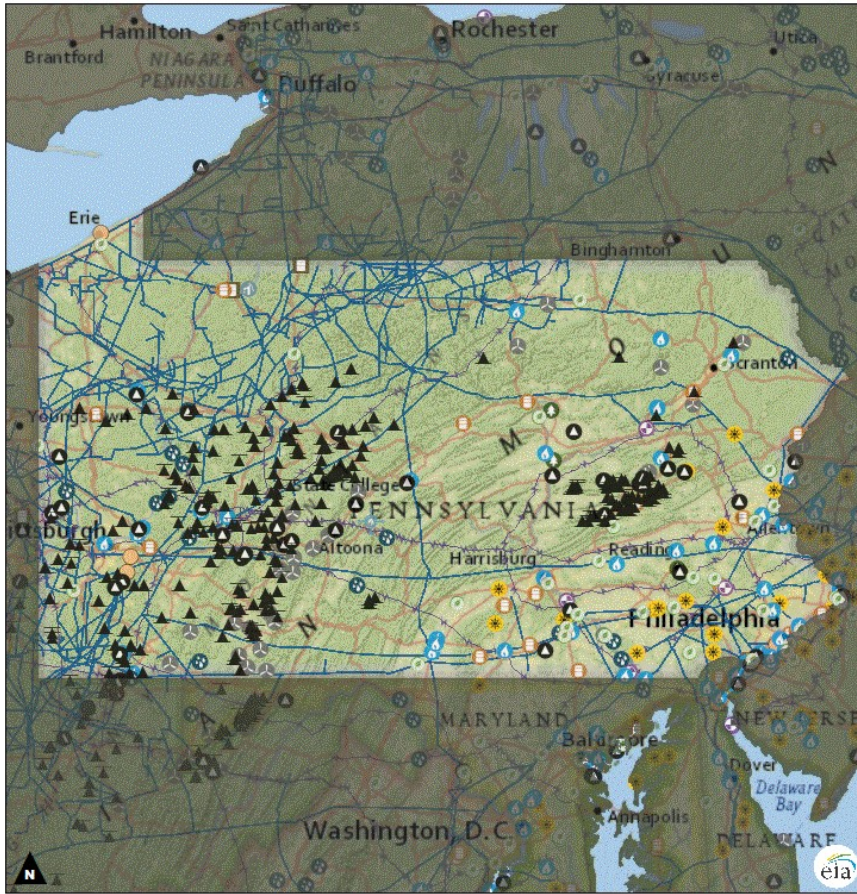

Average PA commercial energy rate is 10.92 cents per kWh – **19.5% lower than the national average**

National leaders in **reliability**, utilities are investing billions in infrastructure technology & upgrades.
