Engage key stakeholders

One of the Most Advanced Electricity Grids in the U.S.

Investments equip system for future growth while driving improved performance

What We are Doing Differently

- 1 Installing smart grid to automatically reroute power and reduce outages
- 2 Deploying innovative early fault detection
- 3 Supporting Distributed Energy Resources through active management
- 4 Expanding transmission capacity through strategic use of technologies

93% reduction
in transmission outages
since 2012

Top Quartile
Reliability Performance
(Nationally)⁽²⁾

**Avoided over 2M
Outages**
since 2015 thanks to
smart grid technology

**214% increase in
DERs connected**
in 2023 compared to 2020

Powering the Economy

Making it easy to do business with us

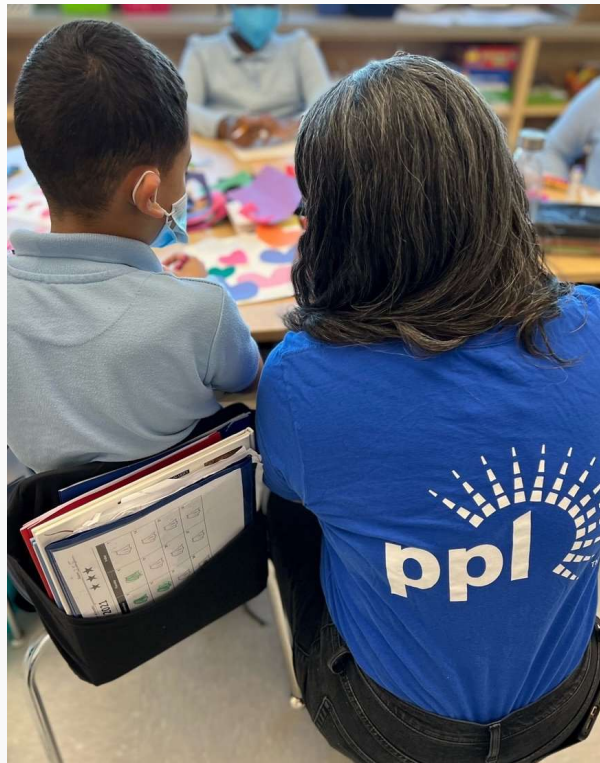

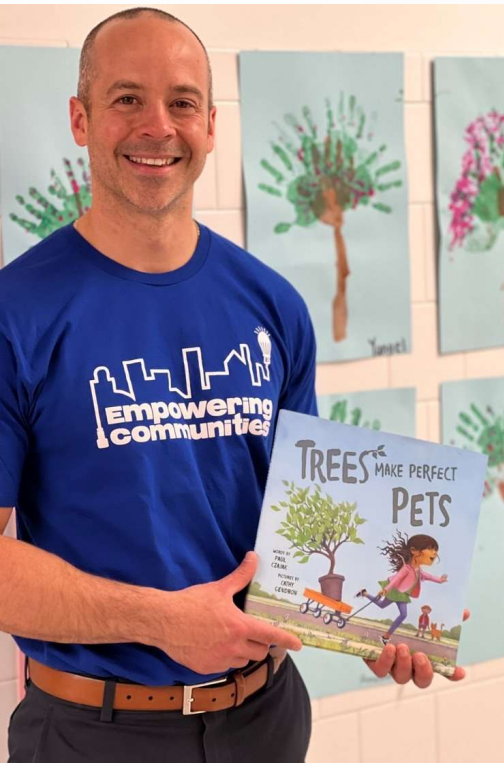

- **Rapid response process provides quick turns on project scope and feasibility**
 - High-level scope, schedule and cost breakdowns of project within five business days.
 - Project feasibility reports issued in weeks versus months.
- **Only utility in PA to offer line extension guarantee**
 - Available to eligible customers looking to construct facilities beyond the existing distribution system route.
 - Helps make projects more affordable for customers while supporting growth in the state.

Key Initiatives in Site Selection

- **Supporting The Pennsylvania Chamber of Business and Industry's Keystone Initiative.**
 - Seeks to measure and track the state's competitiveness and ease of doing business.
- **Supported the Commonwealth's Site Identification exercise.**
 - 30 sites selected as prime business development locations; 10 within PPL Electric's region.
- **PPL Electric competitiveness analysis to benchmark our service territory against competing regions nationally.**
 - Expect final report by end of year.
